

SCIENCE FAIR HELPFUL HINTS

DUE DATE: SCIENCE FAIR PROPOSALS DUE: FRIDAY, SEPTEMBER 16, 2016.

SEARCHING FOR A TOPIC: There are many helpful places to be looking for inspiration in choosing a science fair topic. Think about your interests, hobbies, and favorite activities. Then, think about how science relates to these and how you may want to form an inquiry. The library is filled with books, magazines, and journals that can help you form an original experiment or improve on a classic experiment. There are many online resources such as your science textbook's website: www.blue.msscience.com for grade 8, www.green.msscience.com for grade 7, and www.red.msscience.com for grade 6. All of these lead to the Glencoe webpage. Just click on "Science Fair Ideas" and you will be directed to many resources. Remember to search safely online and always with parental permission.
